

Adopt a system that makes learning part of the grade.

Homework without
compromise.
Results without
compare.

MasteringPhysics™ is the only online physics homework system with research showing that it significantly improves student learning and accurately predicts student performance on finals. A wide variety of published papers based on NSF-sponsored research and independent tests illustrate the benefits of MasteringPhysics™, including:

Students who complete a single MasteringPhysics™ tutorial are able to solve a subsequent, related problem on average 14% faster than their peers (see left-hand plot). Right-hand graph shows an example for one topic area. [Evidence of problem-solving transfer in web-based Socratic tutor – Rasil Warnakulasooriya, David J. Palazzo & David E. Pritchard Physics Education Research Conference, 2005 (in press).]

MasteringPhysics™ increases student speed solving problems

Students Prepared Using MasteringPhysics™
Students Not Using MasteringPhysics™
