Gender Intelligence®

The key to a workplace culture that honors the unique perspectives of men and women.

Gender Intelligence® is the understanding of the naturally-occurring characteristics that distinguish attitudinal and behavioral differences between men and women. By understanding these differences, we gain a better sense of gender-related tendencies that help explain how men and women think, act, and engage more effectively in the workplace.

The Benefits of a Gender Intelligent Culture

- Grow in global competitiveness
- Make better strategic decisions
- Secure and retain top talent
- Create more relevant products and services that mirror the market

BeGenderIntelligent

Real improvement in an organization's culture involves learning how to recognize, value, and leverage positive changes. BeGenderIntelligent is an engaging, multimodal learning experience that allows you to share the exchange of powerful ideas and techniques with your organization. The experience will:

- Illuminate the reasons behind how men and women think and react differently
- Explain how to overcome gender-based blind spots
- Provide hands-on opportunities to practice techniques and develop new skills

**BeGenderIntelligent Partners**

**Gender Intelligence Group**
Barbara Annis is a global practitioner in improving gender relations in the workplace. Annis first coined the term “Gender Intelligence” in the early 1990s and it has since become the global practice of the Gender Intelligence Group: helping companies become more effective and produce greater, more sustainable, results by seeking and blending the contribution of both men and women in unison.
