HELP STUDENTS

achieve success in math

FROM DEVELOPMENTAL MATH TO CALCULUS AND BEYOND,
SMARTHINKING’S ONLINE MATH TUTORING DELIVERS

Using our proprietary virtual whiteboard for live, real-time collaboration, tutors guide students through solving math problems. Smarthinking’s tutors do not solve the problem for students. Instead, tutors use a problem-solving based teaching style to help students learn underlying math concepts. In this way, students learn to handle future assignments on their own.

ON-DEMAND ASSISTANCE

Our certified tutors provide one-on-one, online math tutoring when students need it—24 hours a day, 7 days a week.

ACTIVE LEARNING

Using an online whiteboard for live, real-time collaboration, tutors guide students through solving math problems using active learning methods.

INCREASED FACULTY SUPPORT

Our tutors act as your personal teaching assistants, helping students work through math assignments while reinforcing concepts taught in the classroom. Faculty can spend valuable class time focusing on new topics.

EXPERIENCED TUTORS

Our tutors have substantial teaching experience—most are current or former instructors. And over 85% of our math tutors have a masters or Ph.D. in math. Smarthinking’s certified tutor screening and selection process is rigorous. Once accepted, tutors are thoroughly trained and monitored, and receive ongoing professional development.

Researchers at Broward College (FL) found that students using Smarthinking had significantly higher pass rates than nonusers. In courses ranging from elementary algebra to pre-calculus, Smarthinking students’ pass rates were 10% to 22% higher than nonusers’ pass rates. In every math course, students using Smarthinking had significantly higher pass rates than nonusers.*

J. David Armstrong, Jr.
President
Broward College,
Florida
HERE’S AN EXAMPLE OF A LIVE, DROP-IN TUTORIAL SESSION IN MATH.

Using Smarthinking’s proprietary virtual whiteboard, our math tutor (in grey) helps a student (in maroon) solve an algebra problem. Note how the tutor guides the student through the process of solving the equation.

Online Math Tutoring is available in the following subjects:

- Basic Math
- Algebra
- Liberal Arts Math
- Geometry
- Trigonometry
- Calculus
- Bilingual Math (English/Spanish)

“Even at late hours of the night when I am up doing homework and just cannot seem to do a math problem, I know that I can always turn to Smarthinking and ask an online tutor … a REAL person, and not a computer!”

Brandi L.
Student
South Louisiana Community College
